

**Linksiium showcases 6 of its 100 mentored startups**  
**Viva Technology 2017**  
**Stand Réseau SATT - B22**

**Do you know Linksiium? Not yet.**

**Linksiium is a two year-old academic incubator which becomes a key source of deep and valuable technologies. Linksiium is a unique formula to turn disruptive deep technologies into promising international startups. From Public French Labs to venture capitalists, Linksiium selects, funds and empowers people & technologies.**

- **DRONE INTERACTIVE – Where can you play video games with real drones? Stand B22**

DRONE INTERACTIVE's ambition is to offer immersive and interactive entertainment via a revolutionary experience that brings together drones and augmented reality. Picture yourself piloting a real drone, in a mixed-reality environment, that combines physical and digital worlds. Video games are getting real!

- **MAGIA - Where can you deliver lab blood immuno-analysis directly to patients ? Stand B22**

MAGIA's ambition is to revolutionize blood analysis. MAGIA makes accessible any kind of traditional lab immunoanalysis (30% of blood analysis) on a performant and very simple Point of Care device. Applications are multiple: emergency healthcare, personalised medicine, and low income settings...

- **SURYCATE : Where can you protect your factory from hackers? Stand B22**

Cybersecurity is a sharp issue. Recent events have made people aware that everyone is concerned, even without being a target. But the subject is complex, that is why SURYCATE offers a software to help our customers in their approach of deploying cybersecurity solutions in compliance with the regulations.

- **BLADETIPS ENERGY** : Where can you produce energy with a kite? Stand B22

BLADETIPS ENERGY develops a drone system that produces wind energy. Unlike conventional wind turbines, our system does not need a mast, can reach higher winds and can be used for floating offshore wind farms. It allows us to save 90% of the construction materials and to reduce energy cost by 60%

- **SYLHA** : Where can you fund local communities as you buy your beer ? Stand B22

SYLHA designs and markets a connected coin, associated with a design application and bracelet in order to generate donations for each payment made during a musical event to be paid to local associations or artists to participate in the development of a social and solidarity economy.

- **NOVASCRIB** : Where can we evaluate and improve your French writing skills with Lego® ?

NOVASCRIB offers certifications and playful training in editorial French. A scientific method, derived from 15 years of research in linguistics, to accurately evaluate spelling, syntax, lexical, punctuation skills... Above all it teaches you how to argue effectively with innovative and engaging training methods and benevolent French coaches: all the ingredients of a reliable and friendly Edtech!

#### LINKSIUM SHORT PRESENTATION

Linksium's mission is to accelerate the transfer of technologies from laboratories in the Grenoble-Alpes region, as do the 14 other technology transfer acceleration companies (SATTs) created since 2011 thanks to the Future Investments Program. They ensure the relay between research laboratories and companies. The SATTs finance the risky and upstream phases of the development of technological innovation projects. These new partners simplify and professionalize the innovation system and contribute to the competitiveness of the industry in France.
